

Activity Lead — Operator User Manual

Product: Activity Lead by Creativore

Audience: Community operators and event organisers

Version: 1.0

Last updated: June 2026

About this manual

This guide explains how to use **Activity Lead** from sign-in through daily operations: running events, collecting registrations, following up with leads, sending email campaigns, and reporting results.

It does **not** cover installation, servers, or technical setup. Everything here is what you see and click in the application.

Illustrated figures: Screenshots appear throughout this manual. If a figure is not yet available in your copy, a placeholder line shows where the image will go — add PNG files under `screenshots/` and rebuild (see `screenshots/README.md` in the manual folder).

What Activity Lead does

Activity Lead helps you:

- **Create activities** (events, sessions, sign-up drives) with custom registration forms
- **Publish a link or QR code** so people can register on their phone
- **Build one master client list** — repeat sign-ups from the same person are merged automatically

- **Track lead status** (New, Contacted, Active, Inactive) and follow up via WhatsApp or email
- **Send email campaigns** to consented leads in a community
- **View reports** and export data to CSV

There is **one operator account** per workspace. Participants do not need an account — they only fill in the public registration form.

Signing in and your account

First-time setup (create your operator account)

Use this only when the workspace has no operator yet.

19. Open the application URL provided to you.
20. You are directed to **Create your operator account** (or choose **Create your operator account** from the sign-in page).
21. Enter:
 - **Nickname** — how your name appears in the app (3–32 characters; letters, numbers, spaces, '-', '_', ':')
 - **Email** — used for sign-in and verification
 - **Password** and **Confirm password** — at least 8 characters with upper case, lower case, and a number
22. Select **Create account**.
23. Check your email for a **6-digit verification code**.
24. Enter the code on the verification screen.
25. If you did not receive the code, use **Resend code**. To use a different email, choose **Use a different email**.
26. After verification you are signed in and taken to the **Dashboard**.

Only **one** operator account can exist. After setup, new sign-ups are blocked — use **Sign in** instead.

Sign in

[Screenshot pending: Sign-in page]

27. Open the application URL.
28. Enter your **email** and **password**.
29. Select **Sign in**.
30. If your email is not verified, you are sent to the verification step first.
31. If your session expired, sign in again when prompted.

Forgot password

32. On the sign-in page, select **Forgot password?**
33. Enter your email and select **Send reset code**.
34. Check your email for a **6-digit code**.
35. Enter the code, your **new password**, and **confirm password** on the reset screen.
36. Select **Reset password**.
37. Return to **Sign in** with your new password.

Sign out

Open the **account menu** (top right, your initials) and select **Sign out**.

Navigating the application

[Screenshot pending: Main navigation — sidebar and top bar]

Main menu (left sidebar on desktop)

Menu item	What it is for
Dashboard	Today's overview, metrics, and quick actions
Activities	All your events and sign-up drives
All activities	List, search, and filter activities
Communities	Groups you organise (e.g. tennis club, board game night)
Categories	Labels for activity type (e.g. Social, Clinic)
Clients	Master contact list
Campaigns	Email broadcasts you have sent
Reports	Numbers, rankings, and CSV export

On mobile, open the **menu** icon to reach the same items.

Top bar

- ****Page title**** — where you are now
- ****Updated time**** — on the Dashboard, when metrics last refreshed
- ****Search / command palette**** — press ****Ctrl+K**** (or ****⌘K**** on Mac) to jump anywhere or start common tasks
- ****Theme toggle**** — Light, Dark, or System
- ****Account menu**** — Settings and Sign out

Command palette quick actions

From the command palette you can quickly open:

- Compose new campaign
- Create activity
- Any main menu page

Dashboard

[Screenshot pending: Dashboard overview with metrics and follow-up queue]

The Dashboard is your home screen after sign-in.

When you have no activities yet

You see a guided message:

38. Create an activity
39. Publish and share the QR or link

40. Follow up with campaigns

Use **Create your first activity** or **Set up communities** to get started.

When you have data

The Dashboard refreshes about every **60 seconds**. Sections include:

Today strip — up to three action chips, for example:

- New leads this period → opens filtered client list
- Leads waiting for follow-up → clients with status ****New****
- Live activities → published activities

Needs follow-up — up to five newest **New** leads with **View all** to see more.

Quick actions

- Browse clients
- New campaign
- View reports

Metric tiles (click to drill down)

Tile	Opens
Total leads	Full client list
New (period)	Clients registered in the period
Active activities	Published activities
Follow-up coverage	Clients still marked **New**

Activity performance — activities ranked by registrations.

Community pulse — communities ranked by lead volume; click a community for details.

Recent campaigns — last five sends with delivered / failed indicators.

Activities

An **activity** is one event or sign-up drive (e.g. “FNM Tuesday”, “Board Game Night”).

Activity list

[Screenshot pending: Activity list with search and filters]

Open **Activities** → **All activities**.

Search by name, community, category, or location.

Filters

- ****Status:**** All, Draft, Published, Archived
- ****Category**** and ****Community**** dropdowns

Each card shows name, community, registration count, and status.

Create activity opens the creation wizard.

Lists show **25 items per page** with page controls at the bottom.

Create a new activity (Step 1 of 3)

[Screenshot pending: Create activity — name, community, schedule, location]

41. Select **Create activity**.
42. Enter **Activity name** (what participants will see).
43. Choose **Community** and **Category** (set these up first under Activities if needed).
44. Set **Schedule** (date and time).
45. Choose **Country** and enter **Location detail** (venue, address, or online note).
46. Select **Save draft activity**.

The activity is saved as **Draft** — not yet visible to the public. You continue on the **Form** tab.

Activity detail — four tabs

Open any activity to see:

Tab	Purpose
Overview	Publish, branding, summary
Form	Registration fields (Step 2)
Registrations	Who signed up
QR & Link	Share link and QR (Step 3)

The header shows name, community, category, and status badge: **Draft**, **Published**, or **Archived**.

Draft activities show a banner: **Not live — publish to generate QR and link.**

Activity statuses

Status	Meaning
Draft	Only you can see it; no public registrations
Published	Live form, QR, and link work
Archived	Closed permanently; history kept; cannot publish again

Registrations tab

View everyone who registered:

- **Registration ID** (for check-in)
- **Registrant name** (links to client profile)
- **Submitted** date and time

Paginated at 25 rows. Empty until the first sign-up.

Building registration forms

[Screenshot pending: Form tab — field editor and preview]

Open the activity → **Form** tab (Step 2 of 3).

Launch templates (draft only)

Three ready-made templates replace **all** current fields (you confirm before applying):

Template	Best for
TGH Tennis	Tennis level, clinic interest, referral, consent
Ikigai Pickleball	First-timer, level, invited-by, referral, consent
Board Game Night	Residency, consent block, social handle, referral

Published activities: templates are locked until you **Unpublish** from Overview.

Add and edit fields

Add field types:

- ****Text**** — name, profession, free text
- ****Phone**** — with country code
- ****Email****
- ****Select**** — dropdown options you define
- ****Checkbox****
- ****Consent**** — required agreement text
- ****Referral source**** — how they heard about you

For each field you can set:

- Label and placeholder
- ****Required**** yes/no
- Options (for Select / Referral)
- ****Phone country**** default (Singapore is used if not set)
- Consent wording (for Consent fields)

Reorder fields by dragging the handle or using up/down arrows.

Remove fields you do not need.

Save form

Select **Save form** when finished.

- Saved form applies to ****new**** registrations only.
- Answers from earlier sign-ups are ****not**** changed.

Live preview

The preview shows how the public form will look (read-only).

Publish requirements

Before you can publish, the **saved** form must:

47. Have at least one field
48. Include at least one required ****phone**** or ****email**** field
49. Pass validation (no duplicate field IDs, valid setup)

Unsaved changes on the Form tab do **not** count — always **Save form** first.

The **Publish requirements** section on the Form tab shows whether you are ready.

Archived activities

Forms on archived activities are **read-only**.

Publishing, QR codes, and public links

Publish an activity

50. Complete **Form** tab and **Save form**.
51. Confirm publish requirements are met.
52. Open **Overview** tab.
53. Select **Publish activity**.

Status changes to **Published**. The public path is shown (e.g. `/register/your-activity-name`).

Unpublish

On **Overview**, select **Unpublish** and confirm.

- Public registration stops
- Existing registrations are kept
- You can edit the form and publish again

Archive

Select **Archive activity** (from Overview) and confirm.

- Registration closes permanently
- Data is kept for reporting
- Form and branding become read-only
- You cannot publish again in the current version

QR & Link tab (Step 3 of 3)

[Screenshot pending: QR code and public registration link]

Available when **Published**:

54. **QR preview** — scannable code on white background
55. **Public URL** — full link to copy
56. **Copy public link**
57. **Download PNG** — saves `{activity-name}-registration-qr.png` for print or social

For **Draft** or **Archived** activities, these actions are disabled with an explanation.

Public branding

[Screenshot pending: Public branding — hero image and accent color]

On **Overview** → **Public branding**, customise how the registration page and confirmation email look.

Hero image

- **Upload image** — PNG, JPEG, WebP, or GIF
- Or **paste an image URL** (must be a public link others can load)
- Preview shows 16:9 cover
- **Remove** clears the image

- After upload or pasting a URL, select ****Save branding****

Accent color

- Enter a ****hex color**** (e.g. ``#5e6b2e``) or use the ****color picker****
- Applies to buttons and links on the ****public registration page****
- Select ****Save branding****

Archived activities: branding is read-only.

Communities and categories

These labels organise activities and filter clients, campaigns, and reports.

Communities

Activities → Communities

Add community

58. Enter name

59. Select ****Add community****

Table columns: Community name, activity count, lead count, actions.

Rename: select **Rename**, edit, **Save** or **Cancel**.

Delete: only when **zero activities** use that community. If in use, delete is blocked — rename activities first or use **Rename** on the community.

View leads: opens community detail with searchable client list filtered to that community.

Community detail

- Lead and activity counts
- ****Search**** by name or nationality
- Filter by ****lead status****
- Click a row → client profile
- 25 rows per page

Categories

Activities → Categories

Same pattern as communities: add, rename, delete (only when unused). Categories appear when creating activities and in filters.

What participants experience

You do not need to explain the app to participants — share the **link** or **QR** only.

Opening the form

[Screenshot pending: Public registration form on a phone or browser]

60. Participant opens your link or scans QR.

61. They see activity name, schedule, location, community tag, and optional hero image.

62. They fill in your custom fields.

63. They submit.

Success screen

[Screenshot pending: Registration success with Registration ID]

- “You’re registered!” message
- **Registration ID** with **Copy registration ID** (for check-in at the door)
- Schedule and location recap
- Note if confirmation email was sent
- **Register another person** clears the form for a second entry

If registration is closed

Participants may see:

- Activity not found (wrong link)
- Registration closed (draft, unpublished, or archived)
- Try again (temporary load error)

What you see as operator

- New row on **Registrations** tab
- Client on **Clients** list (new or updated if same phone/email)
- Status usually **New** on Dashboard and follow-up queues

Duplicate rule: one registration per person per activity. A second submit for the same person on the same activity is rejected.

Clients (master contact list)

Clients is your single contact database across all activities.

List view

[Screenshot pending: Clients list with search and lead status filters]

Search by name or nationality.

Filters

- Nationality
- Lead status: New, Contacted, Active, Inactive

Sort by name, status, or last registration.

Quick action: for **New** leads, **Contacted** on the row marks them Contacted (with undo in a toast).

25 clients per page.

Lead status meanings

Status	Typical use
New	Not yet reached out
Contacted	First touch done
Active	Engaged participant
Inactive	No longer active

Status affects dashboard metrics, filters, reports, and campaign segments.

Merge-suspect flag

If the system flags a possible duplicate, a banner appears on the profile. Use **View merge-suspect clients** to compare records manually. There is no automatic merge button — review and update the master profile as needed.

Client profile and follow-up

[Screenshot pending: Client profile — follow-up panel, master profile, timeline]

Open a client from the list or from a registration row.

Header

- Name and avatar initial
- ****Lead status**** badge
- ****Lead status**** dropdown — change anytime

Follow-up panel

- Status and ****Needs outreach**** hint for ****New**** leads
- ****Last registration**** summary
- Phone number
- ****Mark contacted**** (for New leads)
- ****Open WhatsApp**** — logs the action and opens WhatsApp chat

Master profile

View consolidated fields: name, phone, email/social, profession, nationality, residency, consent, referral source, notes.

Edit profile → change fields → save. Corrections apply to the master record; past registration answers stay as submitted.

Registration history

List of activities this person joined (newest first). Select one to see all answers captured on that form and the **Registration ID**.

WhatsApp follow-up

After opening WhatsApp you can record:

- Follow-up status: ****Contacted**** or ****Awaiting reply****
- Optional note
- ****Save follow-up status****

Relationship timeline

Newest events first:

- Registration submitted
- Lead status changed
- Email campaign sent
- WhatsApp chat opened
- WhatsApp follow-up recorded
- Operator notes where applicable

Email campaigns

Campaign list

Campaigns shows past sends: subject, date, delivered count, failed count. Click a row for details.

New campaign starts compose.

If email is not fully configured, a **checklist banner** appears — complete items in **Settings** → **Email delivery** before sending.

Compose a campaign

[Screenshot pending: Campaign compose — choose recipients and segment]

Step 1 — Choose recipients

64. Select **target community** (required).
65. Preview shows: consented leads, ready to send (has email), missing email.
66. Optionally **refine** with filters (all must match): name/email search, nationality, profession.
67. Optionally add **additional recipients** outside the community (must have consent and email).
68. Review **Sending to** list — each person shows **Ready** or **Skipped** with reason.
69. **Reset** clears targeting.

Consent rule: only people who gave consent on a registration form are included.

Step 2 — Write the message

[Screenshot pending: Campaign compose — subject, message, and preview]

70. Enter **subject** (length limit applies).
71. Compose **message** in the rich editor (formatting and images supported).
72. **Preview** — desktop and mobile views.
73. **Send test to me** — sends to your operator email.

Step 3 — Templates (optional)

- **Load template** from saved list
- Edit and **Save template**, **Update template**, or **Delete template**

Step 4 — Send

74. **Send campaign**
75. Confirm recipient count in the dialog
76. Review result: sent / failed counts; expand failures for details

Send is blocked when: no community selected, no consented recipients with email, empty subject or body, message too large, or email delivery not ready.

Campaign detail

After sending, view:

- Subject and sent time
- Totals: sent, failed, skipped
- Full message body
- **Recipients** table: name (link to client), email, status, failure reason

Reports and CSV export

[Screenshot pending: Reports — filters, summary tiles, and rankings]

Reports answers “how did we do?” for a date range and filters.

Date range

- ****This week**** (default)
- ****This month****
- ****Custom range**** — pick start and end dates (both required)

Filters (combine with AND logic)

- Activity (one or all)
- Community
- Lead status
- Referral source

Filter chips show active filters; remove individually or **Clear all**.

The report reloads when filters change.

Report sections

Summary tiles (clickable): Registrations, New leads, Activities hosted, Follow-up coverage.

Lead growth: new leads in period, cohort size, existing before period, repeat participants, inactive in cohort.

Follow-up status: counts by New / Contacted / Active / Inactive.

Activity ranking: top activities by registrations.

Community ranking: top communities by registrations.

Campaign results: campaigns sent and failures in the period (when applicable).

If nothing matches, widen the date range or clear filters.

Export CSV

77. Set filters and wait for the report to match.

78. ****Export CSV**** (enabled when registrations > 0).

79. File downloads with all active filters applied; a toast confirms row count.

Use CSV in Excel or Google Sheets for deeper analysis.

Settings

[Screenshot pending: Settings — appearance, brand accent, password, email delivery]

Open **Settings** from the account menu.

Appearance

Choose **Light**, **Dark**, or **System**. Same as the top bar theme toggle; preference is saved to your profile.

Brand accent

Customise accent color for **your admin workspace** (buttons, toasts, dashboard highlights — lead status colors stay fixed).

- Pick a **preset** or enter **custom hex** → **Apply custom**
- **Reset to default forest** removes custom accent

Password

Change your operator password: current password, new password, confirm → **Update password**.

Email delivery

Checklist for email sending readiness (sender verification, domain setup). Status icons: complete, action required, warning, info. When ready, sender name and email are shown.

Complete any **action required** items with your email provider before large campaigns.

Common workflows

Launch a new activity end-to-end

80. **Activities** → **Communities / Categories** — create labels if needed.
81. **Create activity** — name, schedule, location → **Save draft**.
82. **Form** tab — template or custom fields → **Save form**.
83. **Overview** — optional **Public branding** → **Save branding**.
84. **Publish activity**.
85. **QR & Link** — copy link or download QR.
86. Share at the event; watch **Registrations** and **Dashboard**.

Follow up on new leads

87. **Dashboard** → **Needs follow-up** or filter clients by **New**.
88. Open client profile.
89. **Open WhatsApp** or include in a **campaign**.
90. **Mark contacted** or change lead status.
91. Save **WhatsApp follow-up status** if needed.
92. Check **timeline** for history.

Send a community email

93. Confirm **Email delivery** checklist is ready.
94. **Campaigns** → **New campaign**.
95. Select **community**; refine filters if needed.
96. Write message; **Preview** and **Send test to me**.
97. Optionally save as **template**.
98. **Send campaign**; review failures on detail page.

Monthly reporting

99. **Reports** → **This month** (or custom range).
100. Add filters (community, activity, status, referral).
101. Review rankings and metrics.
102. **Export CSV** for records.

Tips and conventions

- **Save often** on forms and branding before publishing.
- **Registration answers cannot be edited** after submit — fix master profile for corrections; timeline records changes.

- **Archived** activities stay in reports but cannot accept new sign-ups.
- **Pagination:** large lists show 25 rows per page.
- **Toasts** confirm saves and sends; some actions offer **Undo**.
- **Command palette (Ctrl+K)** is the fastest way to jump pages.
- **Public registration** works on mobile — test your QR before the event.
- **Registration ID** on the success screen helps door check-in.

Glossary

Term	Meaning
Activity	One event or sign-up drive with its own form and link
Registration	One person's sign-up for one activity
Client	Master contact record; may have many registrations
Community	Group label (e.g. club or programme name)
Category	Type label (e.g. Social, Workshop)
Lead status	New, Contacted, Active, or Inactive
Campaign	One email send to a selected audience
Consent	Permission captured on the form to contact someone
Registration ID	Check-in code shown to participant after sign-up
Draft	Activity not yet public
Published	Activity live for registration
Archived	Activity closed; history only
